# MAKING ORGANIC CHEMISTRY FUN TO LEARN

#### **ORGANIC CHEMISTRY AND YOU**

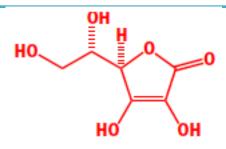

#### WHAT IS ORGANIC CHEMISTRY

sucrose – ordinary sugar isolated from sugar cane or sugar beet white crystalline solid

isooctane (2,3,5-trimethylpentane) a major constiuent of petrol volatile inflammable liquid

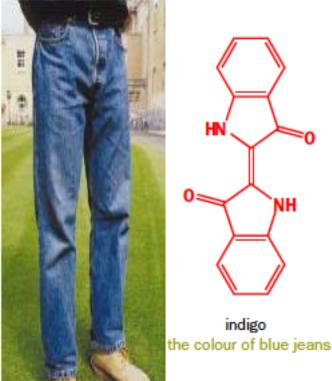

### **ORGANIC CHEMISTRY AND INDUSTRY**

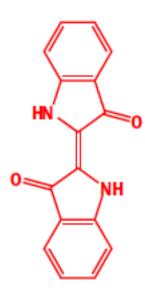

vitamin C (ascorbic acid)

Vitamin C (ascorbic acid) is a vitamin for primates, guinea-pigs, and fruit bats, but other mammals can make it for themselves.

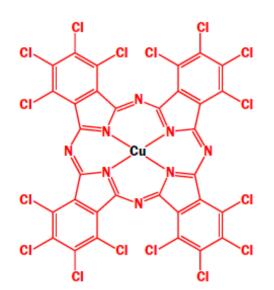

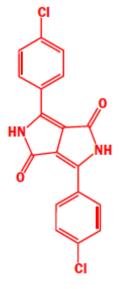

indigo

ICI's Dispersol benzodifuranone red dyes for polyester

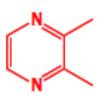

ICI's Monastral Green GNA a good green for plastic objects

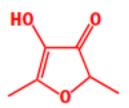

Ciba Geigy's Pigment Red 254 an intense DPP pigment

## ORGANIC CHEMISTRY AND INDUSTRY

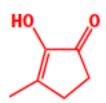

an alkyl pyrazine from coffee and roast meat

furonol roast meat

corylone caramel roasted taste

maltol E-636 for cakes and biscuits

Zeneca's tenormin cardioselective β-blocker for treatment and prevention of heart disease

Squibb's captopril specific enzyme inhibitor for treatment and prevention of hypertension

for treatment of bacterial infections
