

Flipped Classroom

Government College Seraj, Lambathach, has pioneered the Flipped Classroom model, revolutionizing the traditional teaching paradigm. In this innovative approach, students are introduced to course material through pre-recorded lectures, online tutorials, and interactive content before class, freeing up classroom time for collaborative learning, discussions, and hands-on activities. This reversal of the conventional lecture-homework format enables students to grasp concepts at their own pace, reviewing and revisiting material as needed. In-class sessions then focus on applying knowledge, solving problems, and engaging in peer-to-peer learning, facilitated by faculty members who guide and mentor.

Through Flipped Classroom, Govt. College Seraj fosters a student-centered environment, promoting active learning, critical thinking, and creativity. By leveraging technology, faculty members create interactive videos, podcasts, and digital resources, making learning accessible and engaging. Classroom time is optimized for group work, debates, and project-based learning, encouraging students to take ownership of their learning. This approach also allows for personalized attention, as teachers can address individual concerns and provide targeted feedback. The Flipped Classroom model has yielded remarkable results, with significant improvements in student engagement, academic performance, and overall satisfaction.
