

## **No of Awareness programme organized, % of students benefitted, Counseling of suspected addicts**

Government College Seraj has been proactive in combating substance abuse through its Anti-Drug Awareness Programme. During the last academic year, the college organized few awareness programmes, reaching out to over 60% of its student population. These programmes, conducted in collaboration with experts from the health department and NGOs, aimed to educate students about the harmful effects of drug abuse and promote a healthy lifestyle. As a result, 300 students benefitted directly from these initiatives. The programme's impact was evident in the significant reduction in substance abuse cases among students. GCS remains committed to fostering a drug-free environment, ensuring the well-being and success of its students.
