3.2.3 whether access to e-resources

NFLIBNET, which stands for Information and Library Network, is an autonomous Inter-University Centre (IUC) under the University Grants Commission (UGC) of India. It was established in 1991 and is located in Gandhinagar, Gujarat. INFLIBNET's primary objective is to modernize university libraries and information centers in India through the use of information and communication technology. Here are some key aspects of INFLIBNET:

Networking and Connectivity: INFLIBNET is involved in developing and maintaining computer communication infrastructure to interconnect libraries and information centers in universities and other educational institutions across India. This helps in creating a networked environment for efficient sharing of resources and information.

INDEST Consortium: INFLIBNET manages the Indian National Digital Library in Engineering Sciences and Technology (INDEST) Consortium. This consortium facilitates access to electronic resources, databases, and journals for participating institutions, primarily in the fields of engineering, technology, and sciences.

Shodhganga: INFLIBNET oversees Shodhganga, a digital repository for Indian electronic theses and dissertations. Researchers and students can use this platform to submit and access electronic theses and dissertations online.

E-Content Development: INFLIBNET is actively involved in the creation and dissemination of electronic content, including e-books, e-journals, and other digital resources. This contributes to the enhancement of the overall academic and research environment in the country.

Training and Workshops: INFLIBNET conducts training programs and workshops to empower library and information professionals with the latest skills and knowledge related to information technology and digital resources. INFLIBNET plays a crucial role in supporting and promoting information and library services in the academic and research community in India, fostering collaboration and resource-sharing among institutions
